MORE BENEFITS

Our simple "One Connection, One Solution" puts you in control

Golden Data Source

Single connection and integration platform to a golden source of client and industry data: Trade, Risk, Pricing, Collateral and Agreement all in one place.

Open and Shared

AcadiaPlus has been built in collaboration with our clients, infrastructure providers and vendors to offer a range of solutions that enable regulatory compliance as well as margin, collateral and risk management across the entire derivatives trade lifecycle. It is a key component of today's market infrastructure.

Transactions and Reporting

Allows client-controlled distribution, and market connectivity for Sell-Side, Buy-side and Fund Administrator participants and through to Settlement Venues, Regulators and third-party Reporting

SUITE OF SERVICES

A full suite of services accessed via AcadiaPlus

Our Agreement Suite

Focuses on the automation of CSA agreements, enabling digitization of legacy agreements, connectivity to online negotiation providers as well as an intelligent and standardized workflow for the consolidation and affirmation of operational and legal data via one single interface.
