DATA SUITE

Leveraging Acadia's vast data set to provide industry analytics, reporting and services

[BOOK A MEETING](#)

STREAMLINE YOUR DATA AND TAKE ADVANTAGE OF ADDITIONAL SERVICES VIA ACADIA AND OUR PARTNER NETWORK.

Acadia has created an industry-wide repository of trade, margin and collateral data that optimizes and centralizes risk management.

We provide a digitalized, centralized data management service that allows financial firms to improve efficiency and mitigate costs.

Data Suite Solutions

[Data Exploration](#)

Data Exploration

Data Exploration leverages our central vantage point to create an industry standard for reporting and analytics. We provide analysis of your position in the market as well as peer group comparison metrics.

[Learn more >](#)

Industry Risk Classification

Industry Risk Classification is an essential mapping tool for firms utilizing ISDA SIMM™ for regulatory initial margin. The service determines the most commonly used Credit and Equity buckets across the industry for your ISDA SIMM™ calculation.
