STREAMLINED ACCESS TO PARTNER SOLUTIONS

Access

[BOOK A MEETING](#)

One interface. One secure source. Multiple solutions.

Access connects you to your vendor partners from agreement digitization and online negotiation, to Pre-Trade Initial Margin analysis tools and Initial Margin Optimization.

An AcadiaPlus subscription connects you to Acadia's partners via Access. This unique integration layer provides interoperability with a range of partner services, allowing you to make your data work harder and smarter. We enable data-sharing with the partners you choose via one secure connection, giving you flexibility to use multiple third-party service providers and removing the need for you to manage individual upgrades, different integration formats or risk data leakage.
