

AUTOMATING THE MARGIN CALL PROCESS

Margin Manager

[BOOK A MEETING](#)

SEAMLESS CONNECTIVITY

Bringing margin transparency to a global community

Margin Manager is the industry standard messaging application, covering a broad range of asset classes and workflows. It enables pledge and receive margin messaging, fast dispute resolution, full audit trail, as well as integration to other AcadiaPlus applications, internal and vendor collateral management systems.

Unleash the power of automation

[DOWNLOAD PDF ▾](#)

Margin Manager enables real-time transparency into every margin call status and dispute reason. Used by the majority of firms that exchange margin, Acadia works with the industry via its working groups to continually improve and expand its usability.

Share this

We work closely with our clients to help reduce manual intervention, enabling a focus on exceptions. By leveraging the [Relay](#) program, firms can work towards having full counterparty coverage on Margin Manager.

Margin Manager covers a range of agreement types including OTC Bilateral, OTC-Cleared, Exchange Traded Derivatives, Repo, MSFTA, Securities Lending & Borrowing. It is the industry standard for margin call management used by a global network of firms.
